

Setting the Background Color

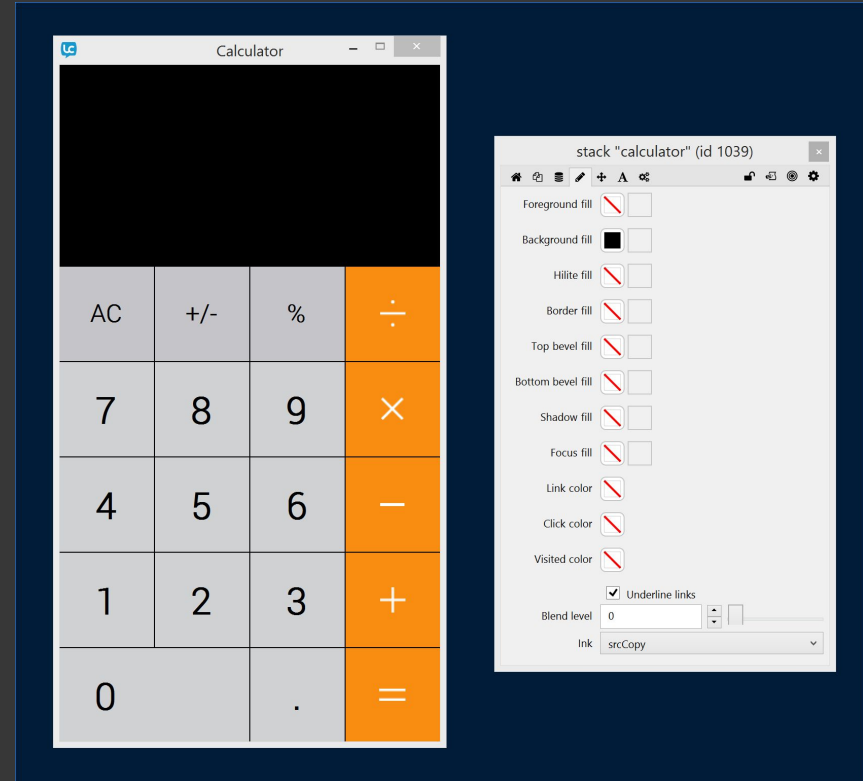

We now want to set the background color of the stack, and the UI is almost complete.

The calculator background color is black. To set this:

- Open the Stack Inspector from the Object menu
- Select the Colors & Patterns pane
- Set the background color to black

Now the calculator has a black background.

Setting the background of the color of the stack means that each card on the stack has a black background - cards inherit the background color property from the stack that owns them.

The Number Display Field

Drag out a label field from the tools palette and on to your stack. This field is the calculator display. Set the properties for the field as in the table below:

Pane	Property	Value
Basic Properties	Name	display
Basic Properties	Fixed line height	False
Contents	Contents	0
Colors & Patterns	Text color	white
Size & Position	Lock size and position	True
Size & Position	Width	375
Size & Position	Height	98
Size & Position	Location	187, 123
Text Formatting	Size	72
